DETAILED ACTION

Allowable Subject Matter

Claims 1-14 are allowed over the prior art.

The following is an examiner's statement of reasons for the indication of allowable subject matter: In the examiner's opinion, the allowable subject matter in this case is a lower support tube fastened in the support mechanism, the lower support tube including an upper limit aperture and a lower limit aperture, an abutment tube inserted into the lower support tube.

Two link arms each having one end pivotably coupled to the side of the abutment tube proximate a bottom of the abutment tube and the other end pivotably coupled to an aperture of each wheel mount.

A lower coupling tube secured to the abutment tube, the lower coupling tube including a sliding lower block, the lower block including a first shaft extended in the upper limit aperture in a retracted position of the combination golf bag and golf cart wherein one end of the first shaft clears from the upper limit aperture when the lower block is pressed for inserting the other end of the first shaft in the Lower Limit aperture.

An upper support tube secured to the lower coupling tube, the upper support tube being fastened in the lower support tube and including a plurality of longitudinal apertures in combination with the other elements recited not anticipated by the prior art, nor would it have been obvious to a person of ordinary skill in this art.
